The purpose of this letter is to submit the required "Accidental Spill Prevention Plan."

## **ACCIDENTAL SPILL PREVENTION PLAN CYPRESS GROVE CHEVRE CHEESE PRODUCTION FACILITY**

Permit Number: 004-01-0002  
Permit Expires: 10/29/2014

### **I. GENERAL INFORMATION**

Facility Name: Cypress Grove Chevre  
Address: 1330 Q St, Arcata, CA 95521  
Accidental Spill Prevention Plan Contact: David Estes, Operations Manager  
Daytime Phone Number: (707) 825-1100  
After Hours: (707) 498-9432  
Secondary Contact: Jeremiah Burger, Maintenance Lead  
After Hours: (707) 498-7861  
Tertiary Contact: Sonny Simonian, Quality Assurance Manager  
After Hours: (707) 616-3863  
Type of Business: Dairy Food Manufacturing  
Operating Schedule: 5:00 AM to 6:30 PM, 7 days per week, 365 days/year

### **II. DISCHARGE PRACTICES**

Discharge is continuous flow and is carried out in accordance with the City of Arcata's Industrial Wastewater Discharge Permit #004-01-0002.

### III. STORED CHEMICALS

All full strength chemicals are stored in the Delivery Truck Bay. Smaller amounts of chemicals are stored in various areas throughout the creamery.

#### IV. PROCEDURES FOR NOTIFICATION OF ACCIDENTAL DISCHARGE

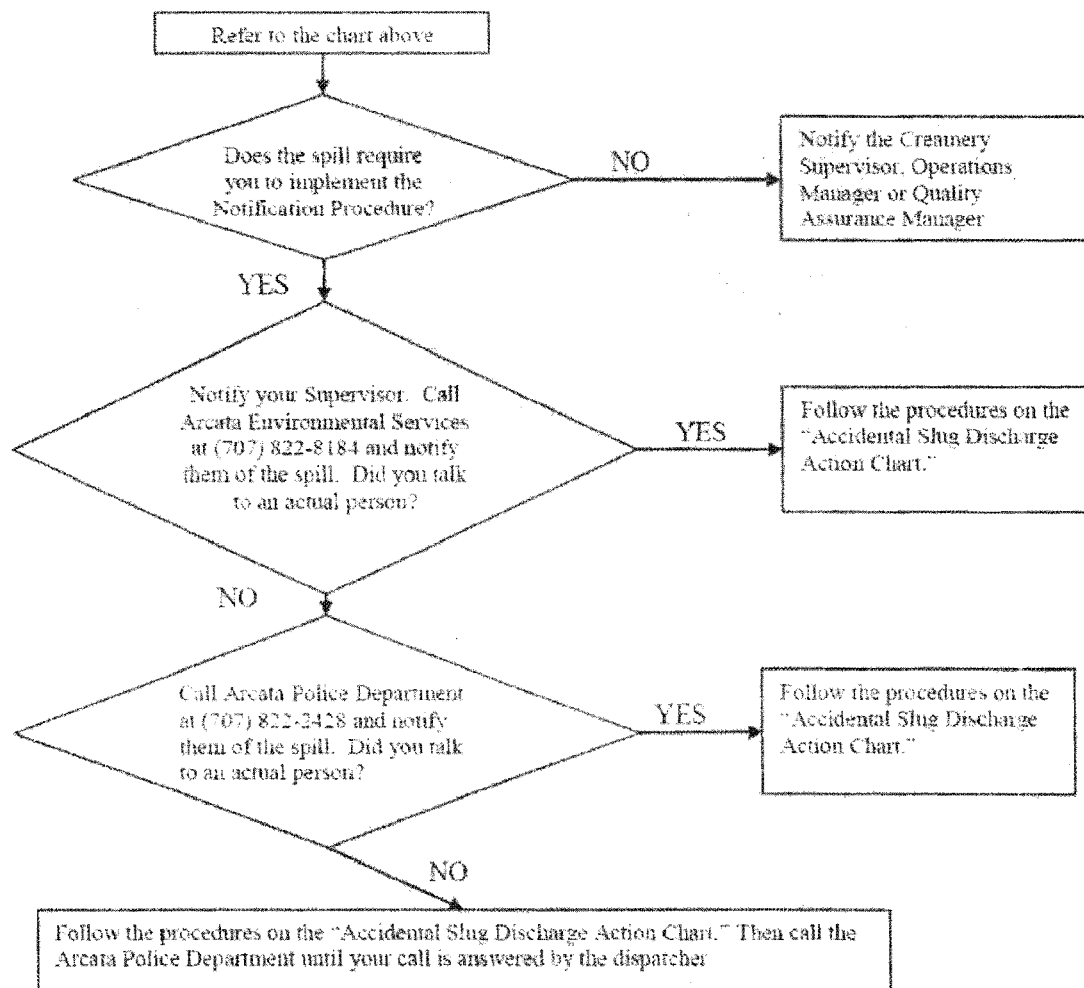

In the event of an accidental spill or slug load that reaches the sanitary sewer or storm drain system, Cypress Grove Chevre is required to immediately notify City of Arcata Environmental Services Department using the Accidental Discharge Notification Procedure below. Messages left on Environmental Services voice mail will not fulfill the notification requirement.

### **Accidental Discharge Notification Procedure**

Accidental Slug Discharge is defined as Any pollutant, including BOD, released in a non-routine, episodic, or noncustomary batch discharge at a flow rate or concentration which has the potential to cause an adverse impact on the municipal wastewater system or exceeds the allowable effluent concentrations as defined in the City of Arcata Industrial Wastewater Discharge Permit #004-01-0002 for Cypress Grove Chevre Cheese Production Facility.

| Chemical              | Implement Notification Procedure if you spill more than: |
|-----------------------|--|
| Any liquid chemical   | 3 gallons  |
| Any powdered chemical | 1 pound  |
| Milk                  | 10 gallons   |
| Whey                  | 10 gallons   |

## V. SLUG LOAD PREVENTION PROCEDURES

**Slug discharge:** Any pollutant, including BOD, released in a non-routine, episodic, or noncustomary batch discharge at a flow rate or concentration which has the potential to cause an adverse impact on the municipal wastewater system or exceeds the allowable effluent concentrations as defined in the City of Arcata Industrial Wastewater Discharge Permit #004-01-0002 for Cypress Grove Chevre Cheese Production Facility.

### A. *Accidental Slug Discharge Action Plan*

### **Accidental Slug Discharge Action Plan**

| Chemical              | Implement Accidental Slug Discharge Action Plan if you spill more than: |
|-----------------------|---|
| Any liquid chemical   | 3 gallons   |
| Any powdered chemical | 1 pound   |
| Milk                  | 10 gallons  |
| Whey                  | 10 gallons  |

#### **Accidental Slug Discharge Procedures:**

1. Immediately alert area occupants and supervisor, and evacuate the area, if necessary. If possible, immediately upright any fallen containers to stop the spillage of chemicals.
2. If there is a fire or medical attention is needed, contact Public Safety at 911.
3. Attend to any people who may be contaminated. Contaminated clothing must be removed immediately and the skin flushed with water for no less than fifteen minutes. Clothing must be laundered before reuse.
4. If a volatile, flammable material is spilled, immediately warn everyone, control sources of ignition and ventilate the area.
5. Notify everyone in the plant that there has been a chemical spill and stop all water use in the plant immediately.
6. Do not return to the spill area until deemed safe by the Creamery Supervisor, Operations Manager or Quality Assurance Manager

### **B. *Employee Training***

All plant employees shall be trained on the "Accidental Discharge Notification Procedure" and "Accidental Slug Load Action Chart" on at least an annual basis. Both procedures are to be continually posted in plain view in the chemical storage area.

### **C. *Containment Structures***

In the event that an accidental discharge occurs in the processing area all water use will cease immediately and the grey water effluent valve located in between the southernmost holding tank and the flow-meter storage tank shall be closed to prevent accidental discharge into the municipal sewer.

#### **D. Inspection and Maintenance of Storage Areas**

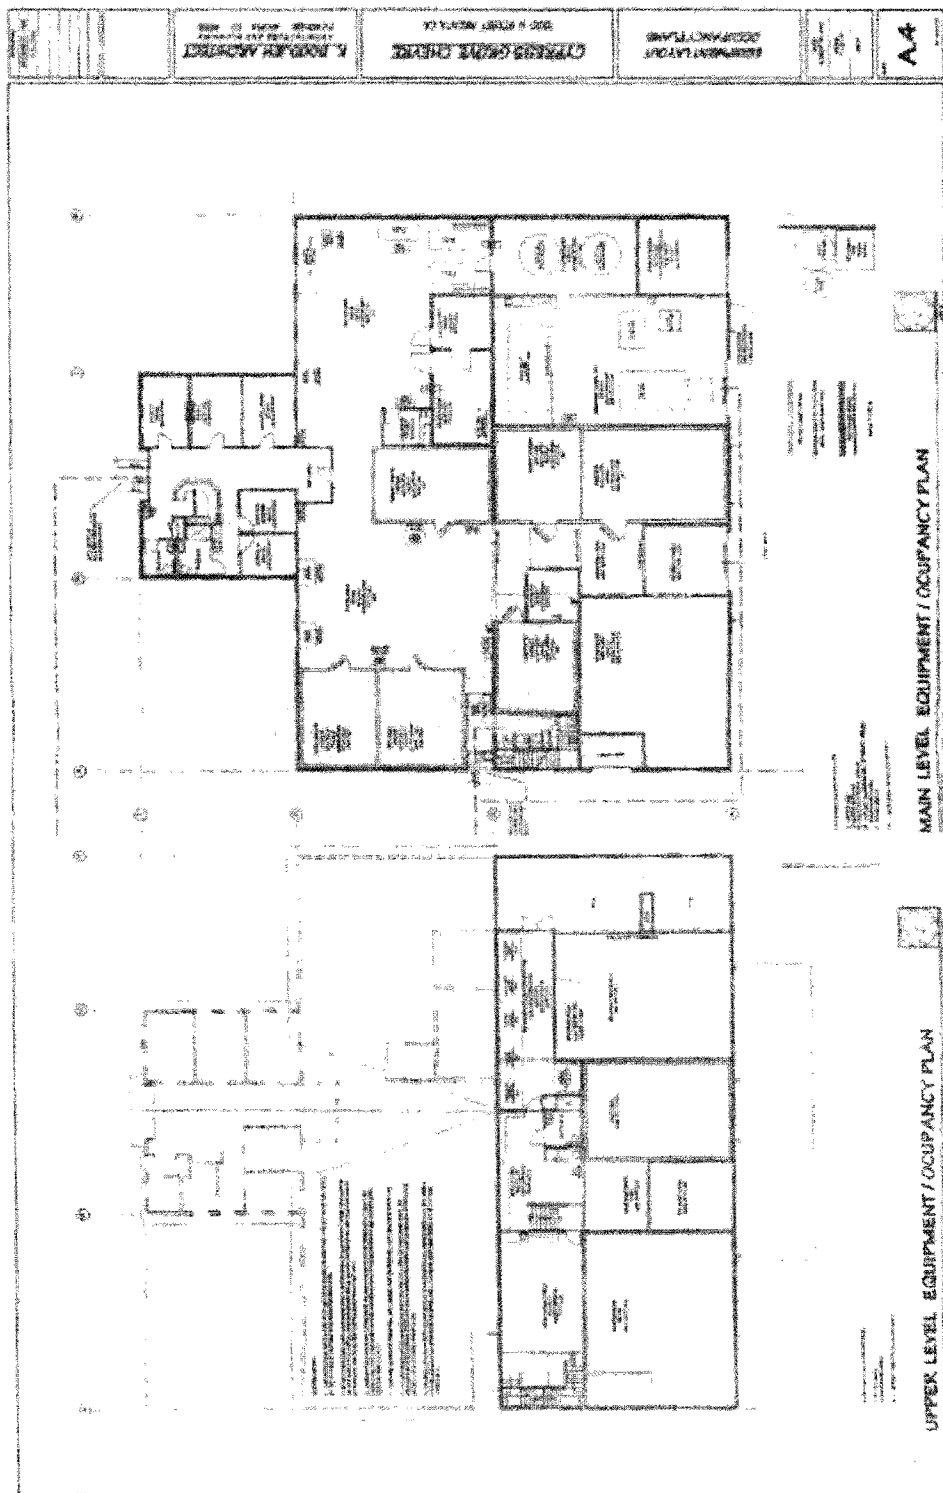

The chemical storage area shall be inspected on at least a weekly basis to ensure that no physical defects are present in the chemical storage area floor, containment basins or chemical drums. Any defects discovered shall be rectified in a timely fashion

### **VI. SIGNATORY REQUIREMENTS**

"I certify under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is the best of my knowledge and belief, true, accurate and complete.
